Introduction

ENDRUW TECHNOLOGIES was established in 2014 and is a 100% black owned company with Level 1 empowerment and has a well-trained and motivated workforce with up-to-date knowledge in the areas we operate in.

Our hands-on approach ensures that our experience is used to the benefit of our clients. We encourage clients to discuss their particular needs with us so that we can provide tailormade services of high standards and quality.

We are dedicated to professional development and service delivery by aligning ourselves with strategic suppliers and partners who share our vision. We have identified the shortage of employment and expectable standard of living among our people.

ENDRUW is a progressive business aiming to do its best to offer superior services and give back to communities by contributing to Government's vision of poverty alleviation through job creation.

We offer reliable, professional and reputable expertise, service and competitive pricing. We are also committed to high quality and on time delivery. We can service the local and international market as well as the mining and private sector.

Who Are We

Quality Assurance

Quality Assurance and safety are extremely important aspects of our daily activity as the company works strictly with SABS requirements. The management team is also committed to provide the necessary training and tools to ensure that quality projects can be provided to all our clients.

Empowerment Policies

We look at the advancement of South Africa's disadvantaged communities and establish an employment equity policy that will assist individuals within the structured program. In addition we also adhere to the policy of sub contracting small, medium micro enterprises and black empowerment companies wherever possible.

Empowerment

ENDRUW TECHNOLOGIES is committed to employment equity and broad based black economic empowerment. We value skills and invest in the development of our staff that is qualified, certified and trained in their respective fields. We believe that on-going staff training is essential and so we encourage our people to be flexible and dynamic as we grow their potential strength.

Our Values

We are trusted in the market place and stand for integrity by setting a standard and inspiring others to always be truthful and fair as principles are held higher than profit. A binding pledge that obligates us to assume a position or carry out a course of action. Making a commitment to what you do in your neither personal nor professional life is one of the fundamental principles of success.

SAFETY

The management of ENDRUW TECHNOLOGIES is committed to an active safety, health and environmental management system and will continue to provide leadership support and the means to maintain the highest standard at all times.

We consider the following crucial:

- Implementing and maintaining the requirements of all legislation pertaining to the health and safety of employees as well as the environment
- Eliminating risk to people, equipment, materials and the environment as far as reasonable practical.
- Communicate openly on safety and health issues with employees and relevant stakeholders.
- Ensure that all employees at all levels receive appropriate training and are competent to carry out their duties and responsibilities.
- Provide the appropriate PPE (PERSONAL PROTECTIVE EQUIPMENT) to all employees.
- Adopt a 100% compliance approach to the implementation of health and safety standards and procedures.
- Conduct the necessary risk assessment to minimize and control occupational hazards

MISSION

Our vision is to be the leader in client satisfaction, innovation, professionalism, and superior quality solution.

VISION

We strive to provide excellence through service and we achieve this by employing and /or contracting the best, most motivated, and skilled candidates for the work currently being managed, and by applying standards of excellence in all areas of involvement.
